Part II: Site Description

Identifying Number/Letter

indicate which of the following information has been provided (on a plan, in narrative description or calculations) to clearly, completely and accurately describe existing site conditions.

(of plan, narrative or calculations)	
	Natural Features:
A	Solls
A	Vegetation
A	Topography
—— B, C	Open water bodies (including ponds and lakes)
R,C	Flowing water bodies (including streams and rivers)
	Public and private surface water and ground water supplies on or within 100 feet of site
A	Maximum annual ground water elevations with dates and location of test
A	Boundaries of resource areas checked under Part I, item 11 above
	Other
	Man-made Features:
A	Structures (such as buildings, piers, towers and headwalls)
	Drainage and flood control facilities at the site and immediately off the site, including culverts and open channels (with inverts), dams and dikes
A	Subsurface sewage disposal systems
	Underground utilities
A,B,C	Roadways and parking areas
A	Property boundaries, easements and rights-of-way
	Other

Part III: Work Description

Indicate which of the following information has been provided (on a plan, in narrative description or calculations) to clearly, completely and accurately describe work proposed within each of the resource areas checked in Part I, item 11 above.

mecked in Part I,	item 11 above.
Identifying Number/Letter (of plan, narrative or calculations)	
•	Planview and Cross Section of:
A	Structures (such as buildings, piers, towers and headwalls)
	Drainage and flood control facilities, including culverts and open channels (with inverts), dams and dikes
A	Subsurface sewage disposal systems & underground utilities
Α	Filling, dredging and excavating, indicating volume and composition of material
A	Compensatory storage areas, where required in accordance with Part III, Section 10:57 (4) of the regulations
	Wildlife habitat restoration or replication areas
	Other .
	Point Source Discharge
	Description of characteristics of discharge from point source (both closed and open
	channel), when point of discharge falls within resource area checked under Part I, Item
	. Il discusso de la compania de la c

but not limited to the following:

- 1. Delineation of the drainage area contributing to the point of discharge;
- 2. Pre- and post-development peak run-off from the drainage area, at the point of discharge, for at least the 10-year and 100-year frequency storm;
- 3. Pre- and post-development rate of infiltration contributing to the resource area checked under Part I, item 11 above;
- 4. Estimated water quality characteristics of pre- and post-development run-off at the point of discharge.

Part IV: Mitigating Measures

- 1. Clearly, completely and accurately describe, with reference to supporting plans and calculations where necessary:
 - (a) All measures and designs proposed to meet the performance standards set forth under each resource area specified in Part II or Part III of the regulations; or
 - (b) why the presumptions set forth under each resource area specified in Part II or Part III of the regulations do not apply.
